

Making home safer together.

Drives and control units for
rollers shutters with anti-lifting device

BECKER
Together it's easier.

We are here for your safety

Automated roller shutters with Becker drives and anti-lift device hinder burglary attacks and make your home safer. Combined with a central roller shutter and sun protection control system that opens and closes your roller shutters fully automatically, even when you're on holiday, for example, your home will look as if you were in. This ensures maximum convenience – even when you're on the go.

Roller shutter drive
C01 PLUS series

- Automatic increase of the pressing force when using anti-lifting devices for burglary deterrence
- Sensitive obstacle detection in the DOWN direction for optimal protection of the application and the obstruction
- Mesh technology ensures the automatic networking of all devices to create a powerful network

homee

- Local data storage on the device, option to access on the move via secure remote access
- Commissioning, configuration and operation possible via free CentralControl app
- Voice control possible via Amazon Alexa

CentralControl:
The smart radio control system for roller shutters and sun protection

Radio convenience

Small signal, great effect: with Becker's radio solutions, your roller shutters can be controlled conveniently. With a smart central control, such as the CentralControl CC41 or the homee system, you can keep an eye on your home even when you're away.

Safety first

With roller shutters you protect yourself from nosy neighbours and burglars. With Becker's radio drives, the anti-lift device* is always guaranteed. This extra feature deters burglars and therefore protects your home.
