

# MORE COLOUR, MORE MAGIC

The new radio generation.  
**Connect** as if by magic.

**BECKER**  
Together it's easier.

**+**  
CENTRONIC  
PLUS

# MORE COLOUR

Colour-coded display of receiver status

The newly refined **CentronicPlus** radio generation from **BECKER** stands out thanks to its new design and varied control options. The drive is able to report its status using bidirectional radio. The high-quality hand-held transmitter with multicolour LEDs indicates the feedback from the receivers being addressed – for simple and even clearer operation that outshines all of the standard devices.

New hand-held transmitter (1, 8, 16 channels)  
with multicolour LED display

# FEEL THE CONNECTION

Automatic networking of all devices

More intelligent than ever before: the mesh technology allows individual drives to connect to a powerful network automatically. One-button learn-in: a receiver can be added to the mesh network at the touch of a button, so there is no longer any need for a master transmitter. All drives remain reliably networked – for a new dimension of connectivity.

Feedback also possible via smartphone through integration into the CentralControl system from Becker, e.g. with CC41.

# MORE SAFETY

Transmission reliability and data encryption at the highest level

Keep up to date at all times, wherever you are: **CentronicPlus** ensures a constant connection between the transmitter and the receiver – the radio signal can reach the drive not only directly from the transmitter but also via another drive. The powerful radio frequency and high-security encryption ensure uninterrupted enjoyment and maximum security.

# COMFORT IN A NEW DIMENSION: CentronicPLUS

The CentralControl CC41 is the heart of Becker's own home automation system. It connects the new CentronicPlus radio system to an application which can also be controlled via smartphone while on the move.

- + Easy retrofitting of the CentronicPlus radio system in an existing Becker home automation system by adding the appropriate radio USB stick
- + Central setup and control via mobile devices, e.g. smartphone or tablet
- + Personal data remain stored in the CC41
- + Free App Becker CentralControl
- + Voice control with Amazon Alexa

The CentronicPlus radio system can easily be integrated into the homee system via the Becker cube. homee combines different radio systems to one application for your smart home.

- + Combination of the radio system CentronicPlus with your homee system to expand your smart home
- + Your data is stored on the brain cube and not in a cloud
- + homee is modularly expandable and stands for a future-proof system
- + Voice control with Amazon Alexa, Google Assistant or Siri
- + No monthly fees
