

Living together in a more relaxed way.

With intelligent drives and control units from **Becker**.

BECKER
Together it's easier.

Frank Haubach
 Head of Sales / Marketing,
 Authorised Signatory

A word in advance.

Dear Reader,
 An increasing number of people like to make their lives easier using smart home solutions. As an expert for drives and control units, Becker is also there to support you in this area.

Whether a private home or a major project, a simple drive or a full smart home program: You are our main focus.

To provide you with more security, greater comfort and a better quality of life, we enthusiastically develop high-quality products "Made in Germany". We rely on strong partners from the specialist trade to provide you with the very best advice and a professional installation.

Get to know us – and find out what else is behind the "Becker" brand.

Yours sincerely,

Frank Haubach

A century of delighting our customers.

The tradition of the Becker family is continued and enhanced to this day by another entrepreneurial family – the Wiegelmans.

Back in 1921, the company founders Emil and Adolf Becker were already busy developing solutions to make the lives of their customers easier. Local presence ensured that our company was able to develop and grow throughout the years.

Today, our products are sold around the globe.

Yet we have remained a family-run business where responsibility and quality remain just as important today as they were then. This is the reason why our products are still manufactured in Germany.

Becker was founded in **May 1921** Emil and Adolf Becker were responsible for the growth and continued development of the company over the subsequent years.

In 1994 we receive the initial certification according to DIN ISO: a quality standard that we still maintain and strive for today.

1921 1965 1971 1994 2000 2013 2021

1965 was a key year in the history of our company. We decided to commence developing and producing door drives and corresponding control units specifically for industrial purposes. An important step into the future.

In 1971 we extended our product range to include electric drives for roller shutters and sun protection systems. Another significant milestone for our future success was the development and production of electric and electronic control units.

In 2000, the first tubular drives with electronic limit switching and integrated radio receiver were launched on the market. Much has happened in this area since then. We have always adapted our radio systems to the requirements of the market.

Home automation is a subject everyone is talking about and fully networking your home with a variety of functions is becoming a reality. Becker is launching its bidirectional wireless system and with it the central home automation system CentralControl. This system enables you to easily set up and operate the wireless systems from Becker.

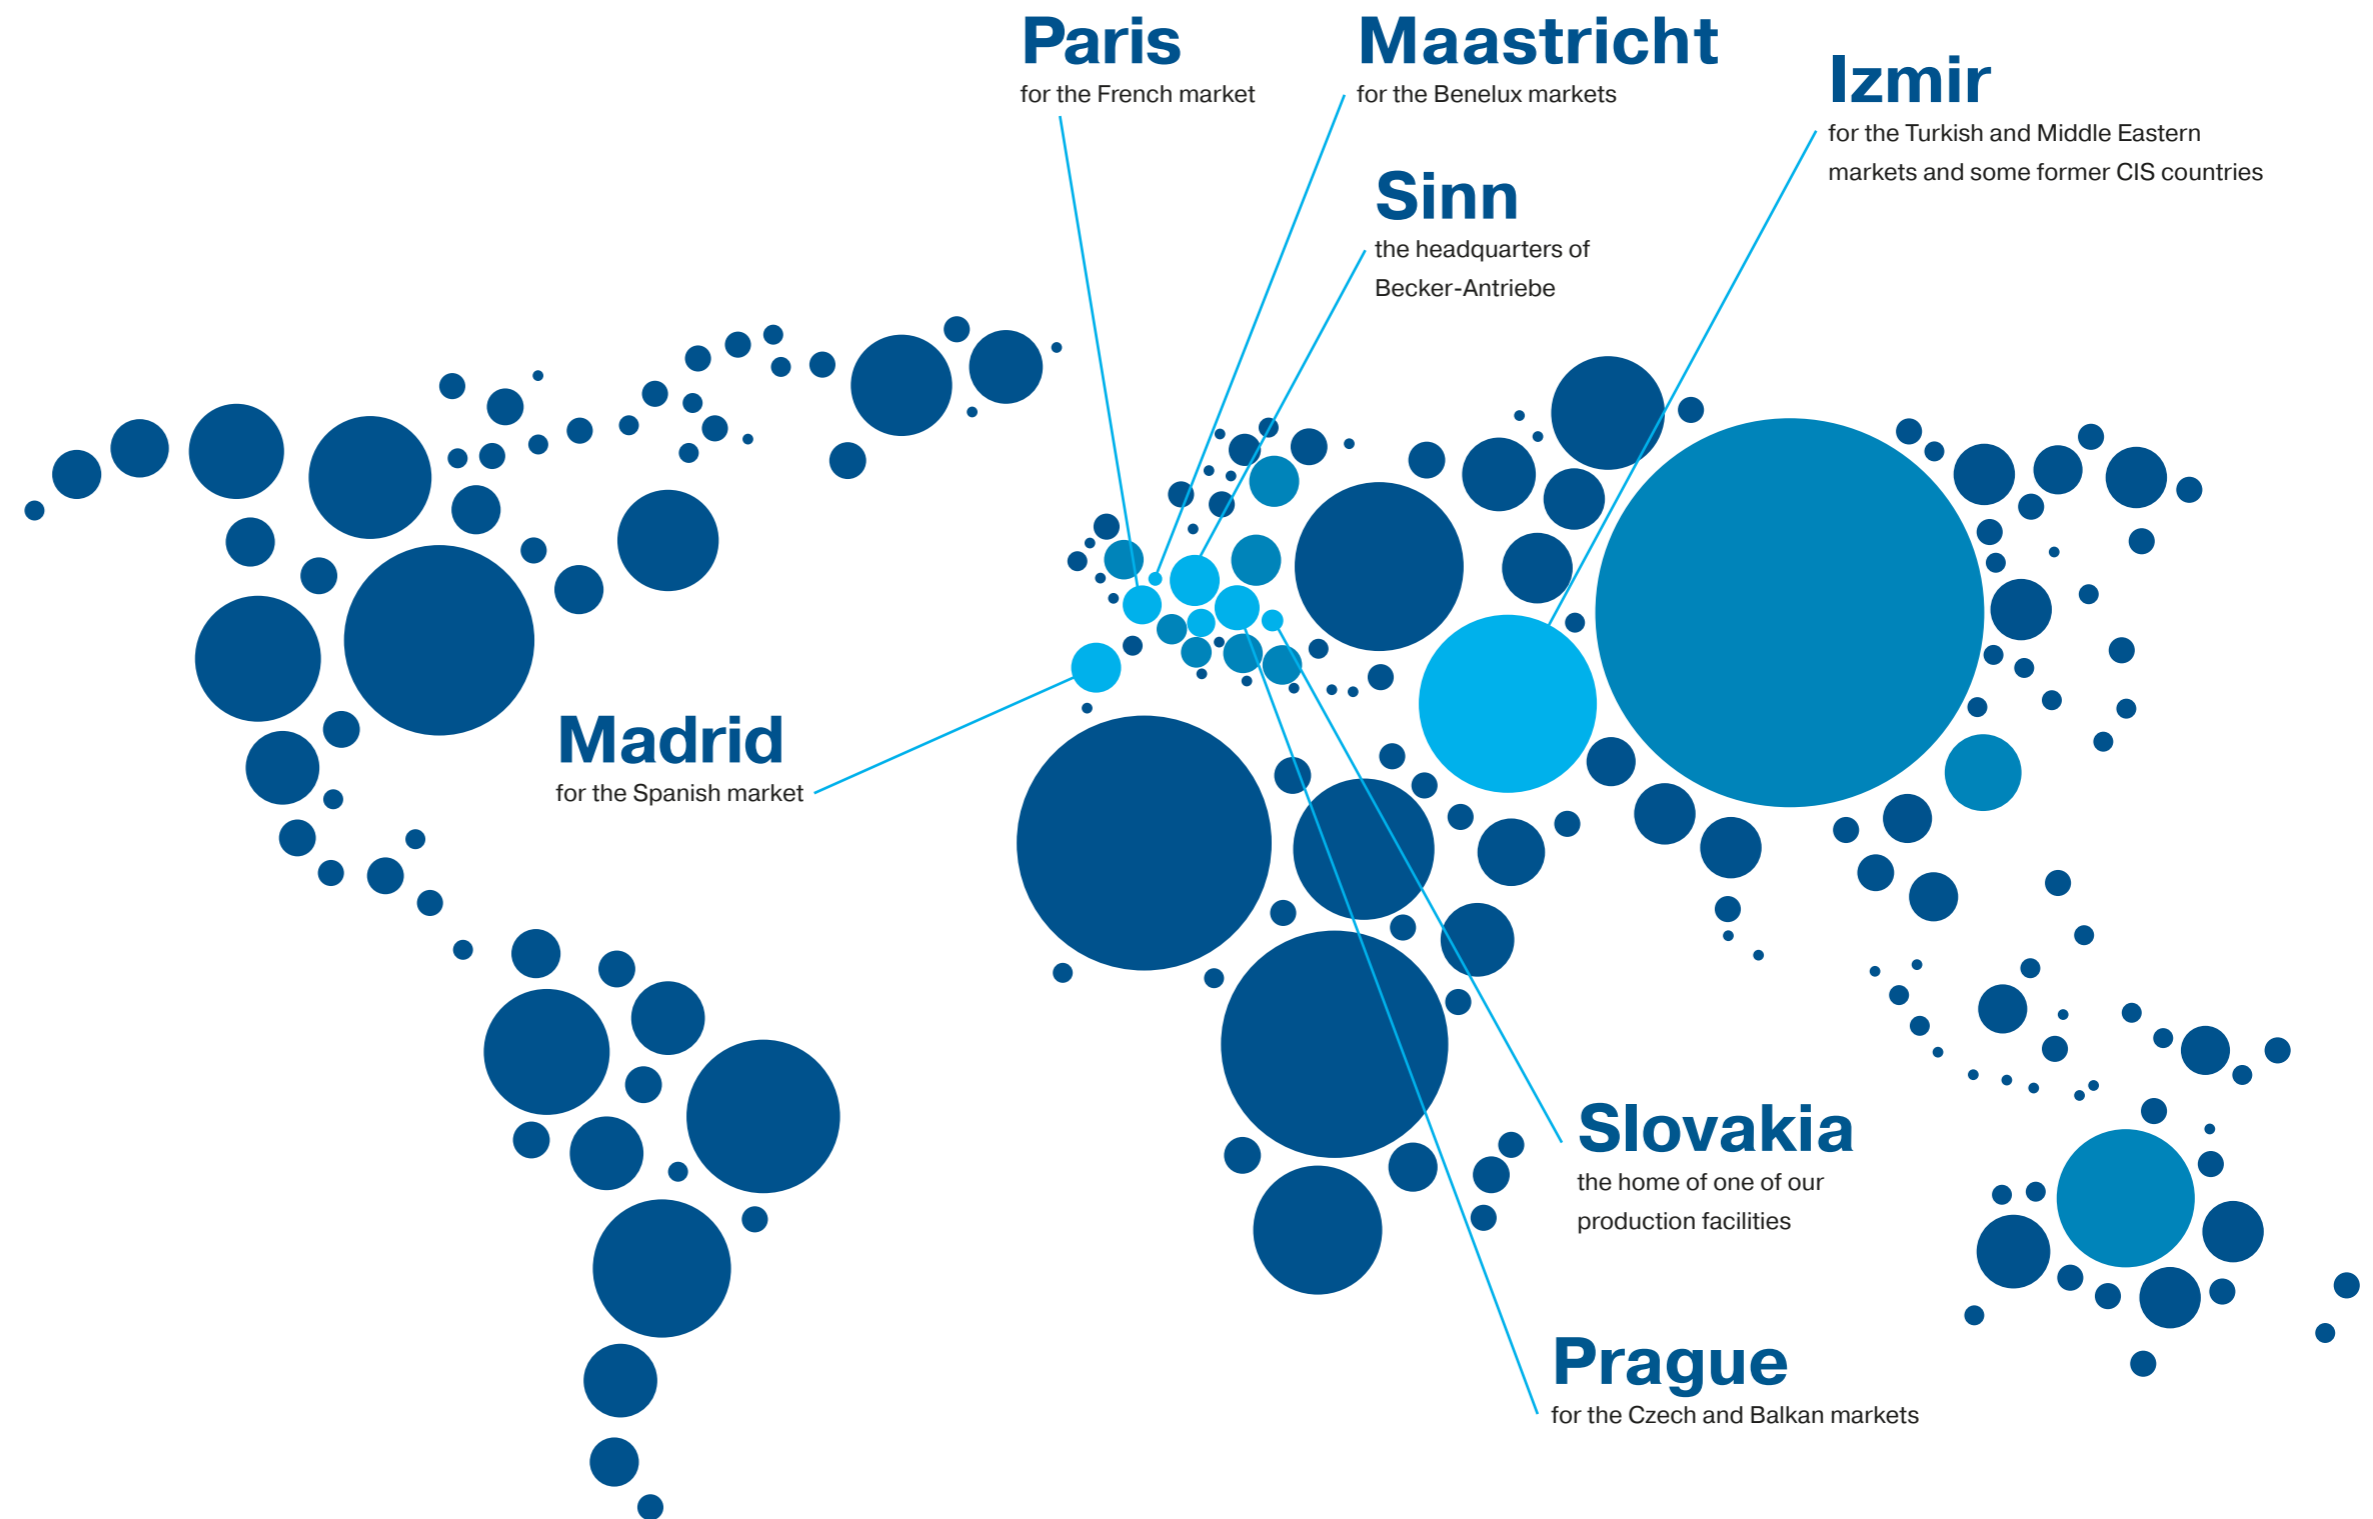

Becker can look back on 100 years of company history in 2021. Even today the grandson of Emil Becker, Hans Joachim Wiegemann, is shareholder and owner of the company. Jürgen Timm leads the company as a managing director. In the meantime, we have become an internationally recognized provider offering large scale capacities: Over 700,000 drives for roller shutters, sun protection systems and special solutions leave our production facilities each year.

At home in the world.

Narrow **250** employees
in Germany and
a further **100**
around the world

help people make their lives more
comfortable and easier wherever they
may be.

We have numerous sites around
Europe and collaborate worldwide
with representatives and permanent
cooperation partners.

Besides the international subsidiaries shown above, you can discover more about
our cooperation partners and representatives at www.becker-antriebe.com.

**Together it's easier.
With Becker.**

“Together it's easier”
is the principle that guides
our thinking and actions.

We position ourselves eye to eye with our customers and treat them with respect and equality. Feel the same level of confidence in our services and staff as we do.

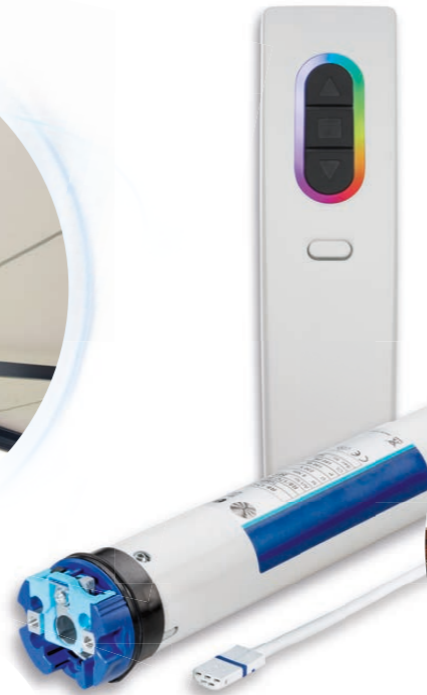

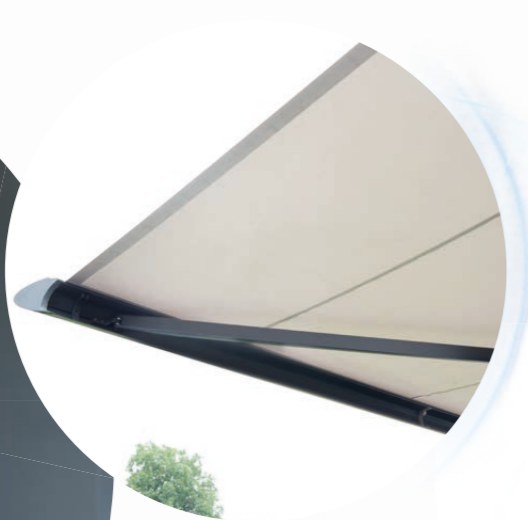

We strive to develop high-quality and individual solutions to make your daily life easier. Right where you need it most. We are proud of creating added value and inspiring people. And to respond quickly whenever you need us.

**Smart products for a
comfortable and relaxed
atmosphere.**

Above all else our products offer you: The opportunity to concentrate on the really important things. If you choose Becker as your expert partner, your redevelopment, renovation or new-build project is less about status and more about increasing your quality of life and feeling comfortable in your own four walls.

Roller shutters and awnings that simply think for you ...

... and offer you
**increased comfort
and safety.**

Your advantages at a glance:

- Simple operation
- Time saving due to automated processes
- Increased safety due to sensitive obstacle detection
- Burglary resistant
- Privacy protection
- Sound insulation
- Less heating costs
- Glare protection
- Material protection
- Protection against harmful UV rays
- Wise investment

Environmentally responsible

Thanks to automated roller shutters, you are able to save up to 15 % on heating energy in the winter or air conditioning in the summer. This is a simple way to ensure energy efficiency and keep your living space liveable – and do the same for future generations too.

Excellent safety and security

With fully automatic roller shutters it always looks like someone is at home and they also offer an effective deterrent to burglars. Even when you are not at home, the wind sensor ensures that the awning is retracted before you even notice a change in the weather.

Intelligent comfort

Whether it is sun protection or roller shutters: Both solutions can be controlled from the comfort of a chair, sofa or lounger. At the push of a button you can improve the room climate or guarantee pleasant shade.

The future for your home: CentralControl

The intelligent roller shutter and sun protection central control

The CentralControl CC41 is the heart of the system and connects all Becker radio systems. It means you can control the roller shutters and sun protection as conveniently as possible and monitor them in the best way possible. Clever logistics mean smart functions. Thanks to Amazon Alexa support, everyday life becomes even more relaxed and convenient.

- For the control of roller shutters and sun protection, light, household appliances and many other devices.
- Commissioning, configuration and operation possible via free CentralControl app
- Operation via Smartphone, tablet or desktop

Everything under control

Thanks to the central control unit, you can access your automation system anytime, anywhere - even from your mobile devices. You no longer need to ask whether the roller shutter in the bedroom is still closed, the heating turned off or the awning retracted. Simply monitor your home through your smartphone, tablet or notebook. And a special feature is that the integrated devices can report back their status thanks to the bidirectional wireless connection.

CentralControl:
The smart radio control system for roller shutters and sun protection

Remote access:
Possible via app and voice assistant

More comfort for you

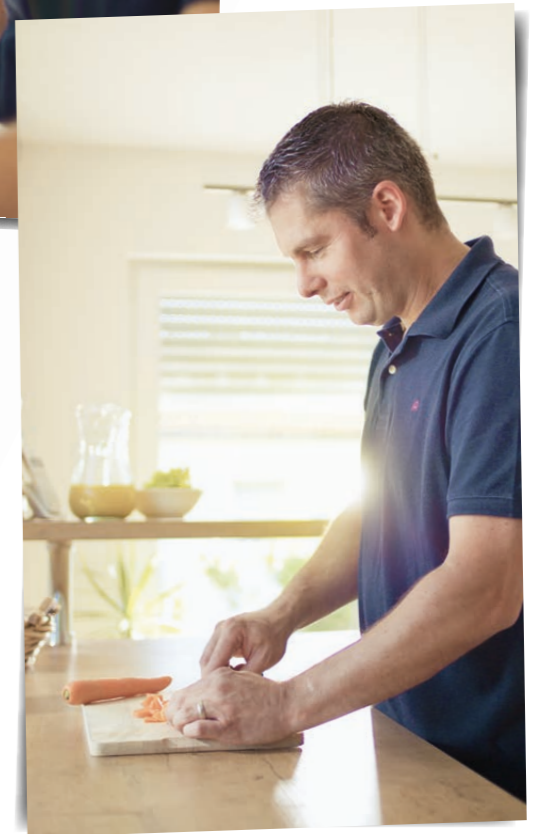

Control your CentralControl unit using Amazon Echo speech recognition – also known under the name “Alexa”. Both systems can be easily combined via the Becker skill. Simply create scenarios with the CentralControl unit, link them to the Alexa app and you are ready to go: “Alexa, welcome to Becker”.

„We have fulfilled our dream.“

We would rather spend less time worrying about our roller shutters and more time enjoying the things that matter most to us. We, therefore, chose intelligently controlled drives from Becker. Our roller shutters now open and close fully automatically – in the mornings, evenings or whenever the sun is too strong, providing some welcome shade during hot summer days. We can now spend our time on more important things. Like our daughter, for example, who is just as delighted and thrilled as we are.

The way the sun shines into our kitchen in the mornings is just perfect now.

The Dietrich family

Nice and dark for exciting films – wonderful shade on hot days. The various roller shutter settings allow us to create the perfect atmosphere for every occasion.

Dom-Aquarée Berlin

Becker drives provide indoor sun protection that harmonises perfectly with the imposing glass design of a building complex. Alongside the exact positioning of the blinds, the drives stand out above all thanks to their flexible control options.

Reliable systems that deliver real benefits..
In every shape and size.

Our customers do not only include private customers who want to realise their own dream of a tailor-made home automation system. For industrial customers, we also fit our drives and control systems in complete office buildings, hotel facilities or on one occasion even in a chocolate museum.

Chocolate Museum Cologne

The famous chocolate museum is fitted with sun blinds operated by Becker drives.

Opening up opportunities ...

Fire curtain
Stöbich Brandschutz GmbH

We also develop solutions suited to even the most special of applications.

A pool which thanks to its extendable cover stays nice and clean and is less of a hazard for small children. Safe boarding access guarantees a reassuring feeling even before your flight takes off. Or the fire-resistant curtain in a shopping centre which literally unfolds its potential in an emergency by gliding down from the ceiling to the floor below.

These are just a few examples where our specially developed solutions help achieve greater safety and efficiency – and, needless to say, they are all tested to Becker's high quality standards.

... and guaranteeing safety and security:
our drives.

**Our main focus:
To make your life
a little bit
easier every day.**

Our seal of quality guarantees safety, comfort and efficiency. And it goes without saying that we are certified to DIN EN ISO 9001. Furthermore, you can rely on the following:

**Knowing
what is
required.**

Our training courses for specialists and qualified fitters ensure the right advice and expertise for the installation of your drive systems. We are committed to promoting further training in the roller shutter and sun protection sector.

Quality from Germany

Becker products are manufactured in Germany and must meet high quality standards. A fact demonstrated by our "Made in Germany" seal.

Environmentally responsible

Becker is your partner for energy efficiency. A fact demonstrated by our energy seal.

High-level training

Our partners receive intensive training at the Becker academy to ensure you are provided with the best service at all times. A fact demonstrated by our "Becker academy" seal.

A reassuring feeling ...

... with products from Becker you can rely on this 100 percent. Because in addition to high quality, you receive a comprehensive service: from expert advice to professional installation. That's why you can find Becker solutions at specialist dealers. So that you as a customer are not only satisfied, but happy too.

**Together it's easier.
With Becker.**
