Enjoy the summer

Controlling awnings and Venetian blinds with Becker

One moment bright sunshine - and suddenly dark storm clouds appear. But instead of rushing outside quickly or home to retract your awning, just relax. Because it has done this itself for a long time, just like your Venetian blinds - fully automatically controlled by drives and controls - from Becker.

Sun protection drives with integrated bidirectional radio receiver

- Blockage detection with multiple testing
 - Two intermediate positions can be programmed
 - Fabric untensioning: The drive protects the fabric by untensioning it in the upper stop limit position - function can be activated/deactivated
 - Higher closing force for devices such as cassette awnings
 - On-site operation possible via a wired 1-way button
 - Compatible with sun/wind/rain sensors for maximum convenience
- Special drives for Zip screens are also available from Becker.

Radio sun/wind/rain sensor and hand-held transmitter

- Setting the threshold values possible via the sensor
- Multicolour display for simple status feedback and start-up
- Integrated rain sensor
- Adjustable sensor foot for optimum outdoor mounting

CentralControl CC41 Roller shutters and sun protection central control

- For the control of roller shutters and sun protection, light, household appliances and many other devices
- Operation via smartphone, tablet or desktop
- Feedback on the actual status of the CentronicPlus devices that are programmed
- Commissioning, configuration and operation possible via free CentralControl app

Radio receiver and hand-held transmitter

- Setting the threshold values possible via the sensor
- Multicolour display for simple status feedback and start-up
- Blind mode: Two intermediate positions with tilt programmable and exact adjustment of slat angle possible

Your contact:

Click instead of crank

At the touch of a button you can easily control your awnings and Venetian blinds according to your wishes. The threshold value setting also prevents the sunshade from constantly moving in and out during a sun/cloud mix.

Always in touch

You can also keep an eye on everything when you're on the go - if you integrate your sun protection into the CentralControl system. For example, you can use your smartphone to extend the awning while on the go and provide a cool spot.

Safety and durability

Upcoming wind or first raindrops? The sign for your awning to move automatically to safety and retract exactly. In this way it will remain with you for a long time - and with it the comfort you enjoy.
