## A word in advance.

Dear Reader,

An increasing number of people like to make their lives easier using smart home solutions. As an expert for drives and control units, Becker is also there to support you in this area.

### Whether a private home or a major project, a simple drive or a full smart home program: You are our main focus.

To provide you with more security, greater comfort and a better quality of life, we enthusiastically develop high-quality products "Made in Germany". We rely on strong partners from the specialist trade to provide you with the very best advice and a professional installation.

Get to know us – and find out what else is behind the "Becker" brand.

Yours sincerely,

he Hanbach tra

Frank Haubach

## **A century** of delighting our customers.

Becker was founded on 7 May 1921. Emil and Adolf Becker were responsible for the growth and continued development of the company over the subsequent years.

Home automation is a subject everyone is talking about and fully networking your home with a variety of functions is becoming a reality. Becker is launching its bidirectional wireless system and with it the central home automation system CentralControl. This system enables you to easily set up and operate the wireless systems from Becker.

## 

1965 was a key year in the history of our company. We decided to commence developing and producing door drives and corresponding control units specifically for industrial purposes. An important step into the future.

In 1971, we extended our product range to include electric drives for roller shutters and sun protection systems.

Another significant milestone for our future success was the development and production of electric and electronic control units.

Becker can look back on 100 years of company history in 2021. Even today the grandson of Emil Becker, Hans Joachim Wiegelmann, is shareholder and owner of the company. Jürgen Timm leads the company as a managing director. In the meantime, we have become an internationally recognized provider offering large scale capacities: Over 700,000 drives for roller shutters, sun protection systems and special solutions leave our production facilities each year.

The tradition of the Becker family is continued and enhanced to this day by another entrepreneurial family - the Wiegelmanns.

> Back in 1921, the company founders Emil and Adolf Becker were already busy developing solutions to make the lives of their customers easier. Local presence ensured that our company was able to develop and grow throughout the years.

## Today, our products are sold around the globe.

Yet we have remained a family-run business where responsibility and quality remain just as important today as they were then. This is the reason why our products are still manufactured in Germany.

## At home in the world.

Narrow 250 employees in Germany and a further **100** around the world

help people make their lives more comfortable and easier wherever they may be.

We have numerous sites around Europe and collaborate worldwide with representatives and permanent cooperation partners.

Besides the international subsidiaries shown above, you can discover more about our cooperation partners and representatives at www.becker-antriebe.com.

## Izmir

## **Together it's easier.** With Becker.

## **"Together it's easier"** is the principle that guides our thinking and actions.

We position ourselves eye to eye with our customers and treat them with respect and equality. Feel the same level of confidence in our services and staff as we do.

We strive to develop high-quality and individual solutions to make your daily life easier. Right where you need it most. We are proud of creating added value and inspiring people. And to respond quickly whenever you need us.

# Smart products for a comfortable and relaxed atmosphere.

Above all else our products offer you: The opportunity to concentrate on the really important things. If you choose Becker as your expert partner, your redevelopment, renovation or new-build project is less about status and more about increasing your quality of life and feeling comfortable in your own four walls.

## garage doors that contribute

#### Your advantages at a glance:

Simple operation

. . . . . . . . . . . . . . . . . .

• Time saving due to automated processes

. . . . . . . . . . . . . . . . . . .

- Increased safety due to gentle obstacle
- detection
- Burglary resistant
- Privacy protection
- Sound insulation
- Less heating costs
- Glare protection
- Material protection
- Protection against harmful UV rays
- Wise investment

#### Environmentally responsible

Automated roller shutters help to cut heating costs in the winter and air-conditioning bills in the summer. You ensure energy efficiency and help to protect the environment for current and future generations.

#### Excellent safety and **security**

With fully automatic roller shutters it always looks like someone is at home and they also offer an effective deterrent to burglars. Even when you are not at home, the wind sensor ensures that the awning is retracted before you even notice a change in the weather.

## and safety.

#### **Intelligent** comfort

Whether it is sun protection or roller shutters: Both solutions can be controlled from the comfort of a chair, sofa or lounger. At the push of a button you can improve the room climate or guarantee pleasant shade.

## The future for your home: CentralControl

#### CentralControl is the system

that can be set up – wirelessly and independently – according to your specific requirements. The wireless standard used for the system not only allows you to network wireless products from Becker with your system but also devices from other manufacturers. You can control your CentralControl unit via the Internet from any location. The system also offers the following highlights:

- Individually programmable time controls, including a holiday function
- Create and organise scenarios
- Save logics ("if/then actions") that enable
  e.g. the roller shutter to be lowered if the
  temperature exceeds a certain value in summer

## Everything under control

Thanks to the central control unit, you can access your automation system anytime, anywhere - even from your mobile devices. You no longer need to ask whether the roller shutter in the bedroom is still closed, the heating turned off or the awning retracted. Simply monitor your home through your smartphone, tablet or notebook. And a special feature is that the integrated devices can report back their status thanks to the bidirectional wireless connection.

## More comfort for you

Control your CentralControl unit using Amazon Echo speech recognition – also known under the name "Alexa". Both systems can be easily combined via the Becker skill. Simply create scenarios with the CentralControl unit, link them to the Alexa app and you are ready to go: "Alexa, welcome to Becker".

## "We have fulfilled our dream."

We would rather spend less time worrying about our roller shutters and more time enjoying the things that matter most to us. We, therefore, chose intelligently controlled drives from Becker. Our roller shutters now open and close fully automatically – in the mornings, evenings or whenever the sun is too strong, providing some welcome shade during hot summer days. We can now spend our time on more important things. Like our daughter, for example, who is just as delighted and thrilled as we are.

The way the sun shines into our kitchen in the mornings is just perfect now.

Nice and dark for exciting films – wonderful shade on hot days. The various roller shutter settings allow us to create the perfect atmosphere for every occasion.

## Dom-Aquarée Berlin

. . . . . . . . . . .

Becker drives provide indoor sun protection that harmonises perfectly with the imposing glass design of a building complex. Alongside the exact positioning of the blinds, the drives stand out above all thanks to their flexible control options.

## **Reliable systems that** deliver real benefits. **In every** shape and size.

#### Chocolate Museum Cologne

The famous chocolate museum is fitted with sun blinds operated by Becker drives.

Spektrum

Our customers do not only include private customers who want to realise their own dream of a tailor-made home automation system. For industrial customers, we also fit our drives and control systems in complete office buildings, hotel facilities or on one occasion even in a chocolate museum.

## **Opening up** opportunities...

We also develop solutions suited to even the most special of applications.

A pool which thanks to its extendable cover stays nice and clean and is less of a hazard for small children. Safe boarding access guarantees a reassuring feeling even before your flight takes off. Or the fire-resistant curtain in a shopping centre which literally unfolds its potential in an emergency by gliding down from the ceiling to the floor below.

These are just a few examples where our specially developed solutions help achieve greater safety and efficiency and, needless to say, they are all tested to Becker's high quality standards.

**Our main focus:** To make your life a little bit easier every day.

Our seal of quality guarantees safety, comfort and efficiency. And it goes without saying that we are certified to DIN EN ISO 9001. Furthermore, you can rely on the following:

## **Knowing** what is required.

#### **Quality** from Germany

Becker products are manufactured in Germany and must meet high quality standards. A fact demonstrated by our "Made in Germany" seal.

## **Environmentally** responsible

Becker is your partner for energy efficiency. A fact demonstrated by our energy seal.

BICKER

Our training courses for specialists and qualified fitters ensure the right advice and expertise for the installation of your drive systems. We are committed to promoting further training in the roller shutter and sun protection sector.

## High-level training

Our partners receive intensive training at the Becker academy to ensure you are provided with the best service at all times. A fact demonstrated by our "Becker academy" seal.

## A reassuring feeling ...

... is fully guaranteed with Becker products. Since in addition to outstanding quality, you are also treated to excellent service: From expert advice to professional installation. This is the reason why Becker solutions are only available from authorized dealers. To ensure that you are not only satisfied, but absolutely delighted with our products.

Together it's easier. With Becker.
