Together it's easier.

Flexibility in motion

Control roller shutters via radio with BECKER

Get your roller shutters moving without having to move yourself with just a touch of a button on your hand-held transmitter, which does everything for you via radio.

A new function is always a highlight, particularly with regards to retrofitting. Radio drives can now also be operated using a standard push-button. Simply upgrade your drive from wired to radio, nothing else needs to change.

Roller shutter drives with integrated radio receiver

- Sensitive obstruction detection for protecting the roller shutter should anything get in its way
- Top and bottom anti-freeze mechanisms
- Forced-entry protection due to anti-lifting devices
- Protection for your fly screen thanks to the special function

TimeControl TC4410-II 10-channel hand-held transmitter with integrated timer

- Functions as the TC445-II, and also includes:
 - 10 individually programmable channels for 10 separate receivers or receiver groups
 - Individually programmable times and channels

MemoControl MC441-II 1-channel memory hand-held transmitter

- Simple programming of switching times
- Memory function
- Manual/automatic slide switch
- Interference-immune radio frequency
- Labelling panel
- Available in black and white
- Available as a MemoControl MC415 wall transmitter that can be integrated in numerous switching ranges

EasyControl EC411 1-channel wall transmitter

- Enables the programming of 2 freely selectable intermediate positions
- Can be integrated into numerous standard switching ranges with 55 x 55 mm central board
- Simple wall mounting
- Can also be used as a hand-held device

Your retailer:

Local operation

The C01 radio drives can now also be operated locally using a standard push-button. Do you want to upgrade from wired to radio? Becker radio drives require less effort and offer more comfort, more quickly.

Save energy

When you close your roller shutters at dusk, you can reduce heating costs by up to 30 %. And, because your roller shutter control system takes care of it, you don't even have to stand up to do anything.

Radio comfort

Small signal, great effect: with Becker's radio solutions, you'll always have your roller shutters under control. They can be easily controlled and positioned in parallel or individually at the touch of a button. And all that without complex cabling.
