FIT FOR
SMART HOME

SMART LIVING.
WITH BECKER.

QUALITY
made in Germany

BECKER
for you. forever.

„I want a home, that understands me. Gives me peace of mind. Lets me live a self-determined life leben into old age. I want a smart home.“

BECKER
for you. forever.

COMFORT

My home
makes it easy for me.

„Our life as a family is pretty lively. I often have to think about a thousand things before everyone is out of the house in the morning and back in bed in the evening.

Fortunately, our roller shutters are not one of them. They go up and down independently - entirely according to my needs.“

And that is through:

- Timer at set times or with astro function
- Light sensor
- Scenarios

NEEDS-BASED

Even then,
when it counts.

Whether elderly or disabled, nobody should have to do without the freedom and security of their own four walls.

Why should you? The smart home thinks for itself and simply takes care of the things that are difficult to do. Roller shutters, lights, awnings: all this and more can be customised and automated to suit your individual needs. For more independence and the good feeling of being at home.

BECKER
for you. forever.

SAFETY

My home
gives me security.

„I love exploring the world. And the moment I return home after a long journey. Because I know that while I'm enjoying my holiday carefree, my smart home has everything under control.“

You too can stay relaxed:

- Presence simulation through automatic opening and closing of the shutters by timer
- Privacy screen
- Switching lights on and off

ENERGY EFFICIENCY

My home
saves valuable energy.

Summer and winter, day and night: Your home knows exactly what you need for comfortable living - and can save up to 30 per cent on heating costs, depending on the type of building, its construction and the proportion of windows.*

How? With automatically controlled timers or intelligent sensors that precisely control your roller shutters all year round. This prevents your living space from heating up and reliably keeps out the cold in winter. Without you having to do anything. The same applies to sun protection. They also extend and retract automatically depending on the weather. So you can make yourself comfortable in peace.

Up to 30 % energy savings possible*

* Details of the CO_2 and energy savings that can be achieved through the use of automated roller shutters and sun protection systems can be found at the following link from the Industry Association for Roller Shutter and Sun Protection Automation (IVRSA): www.ivrsa.de/richtlinien-und-wissen/studien/

BECKER

Smart living

Now and in the future.

There are already countless ways to make life in the smart home easier.

One thing is particularly important to us: your fl exibility. Because diff erent things are important for everyone. And life means change.

That‘s why our solutions are open.

Open to other systems. Open to new developments. And open to your future, in which demands and living conditions change. Discover the Becker world with us. world with us. And the solution that suits your life.

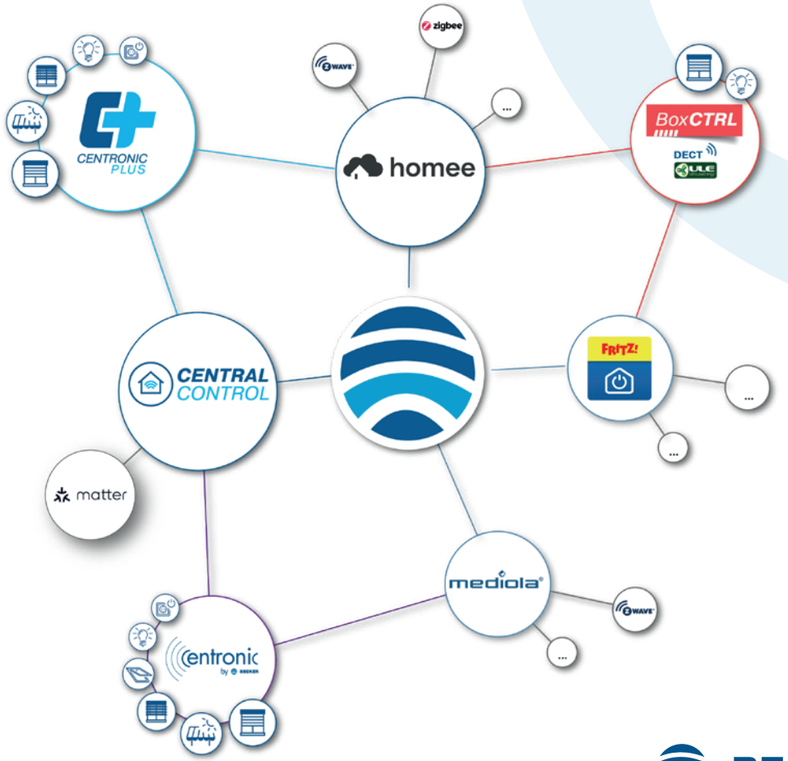
What can be controlled?

BECKER
for you. forever.

Radio solutions

As individual as you are!

The solutions from Becker can be customised to your individual needs and requirements. Regardless of whether you are renovating, remodelling or building a new home: Automated solutions allow you to create a home in which you are always in control. With our products, you are and remain open to other smart home systems that may already be in use in your home.



BECKER
for you. forever.

CENTRAL CONTROL

As a smart compact plug-in control unit …

Even without internet or Wi-Fi, the CC11 keeps you in full control of your roller shutters and sun protection – locally and reliably.

Setup is completed in just a few steps via Bluetooth® and the free app, so you can get started right away. Intelligent timer programs and automatic sun protection functions ensure everything adapts perfectly to your daily routine. Control your system flexibly via the app or traditionally directly on the device – whichever suits you best.

www.becker-antriebe.com/centralcontrol

… or smart roller shutter and sun protection control.

Whatever you want to intelligently automate and connect in your smart home: CentralControl brings it all together. As the heart of the system, it controls not only roller shutters and sun protection, but also, for example, lighting – exactly according to your preferences. You can enter the settings easily via smartphone or tablet.

The CC41 is also Matter®-certified, enabling networking with many other smart home systems.

matter

Further **highlights:**

- **Maximum flexibility** with different radio variants
- Certified **Matter® bridge**
- Remote control via **smartphone, tablet or notebook**
- **Free Be:You app**
- Secure internet connection
- **Individually programmable timer control** incl. holiday function
- Create and organize **scenarios**

by BECKER Be:You

BECKER
for you. forever.

Everything listens to your

command

You can control your smart home particularly easily and conveniently via Scenarios - a collection of actions that are triggered at your command via the CentralControl. You can of course create these scenarios o suit your individual needs and customise them at any time. After all, you know your life best.

Scenario example
„Feel good in the evening““
- TV switches on
- Roller shutters close halfway
- Light dims
- Garden lighting switches on
- Fountain switches on

„When I get home after work, there‘s only one thing I want to do: put my feet up and enjoy the evening.“

„I like things to be relaxed, even when time is pressing. If I‘m on the go, a tap of the finger is enough and my house knows what to do.“

Scenario example
„Leave home“
- Venetian blind on turn
- Garden pond from
- Open garage
- Light off

Scenario example
„Safety“
Panic button as a scenario:
If you suspect unwanted guests in the house at night, you can switch on the lights and radio switch on the lights and radio and raise the shutters, for example.

„roller shutters make life difficult for burglars. If I do wake up, I simply raise the alarm from my bed.“

Handheld transmitter
for added flexibility and convenience

Voice control
gets your home moving on in motion on call

Simple
operation.
As individual as you are.

Smartphone, tablet, PC or notebook
So you can control your smart home while you‘re on the move

Sensors
for more safety and clever functions

Wall transmitter
has its fi xed place and reacts at the touch of a button

CentralControl
Roller shutter and sun protection control centre for the organisation, operation and automation

Wired or radio?

With Becker you remain flexible here too. We make your home into a smart home with both systems.

The convenient solution is bidirectional radio drives, that communicate directly with the CentralControl: They receive their signals and provide immediate feedback.

You have already installed wired drives and don‘t want to replace them all? Then external radio receivers, which are simply installed between the wall switch and drive, can help. They reliably transmit the reliably transmit the signal from your central home automation system to the drive - paving the way for smart living.

Whether new build, renovation or modernisation: Enjoy a completely new lifestyle with us!

BECKER
for you. forever.

STANDARD
MOTOR INTERFACE

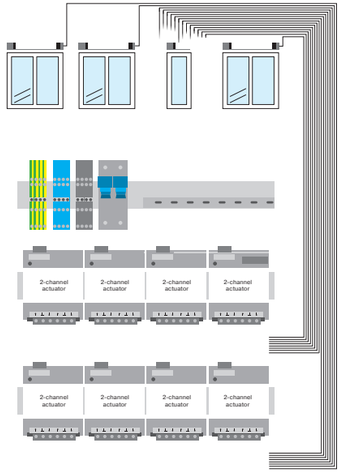
Interdisciplinary

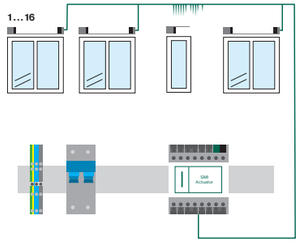
automation…

With the standard interface SMI (Standard Motor Interface), electric drives for roller shutters and sun shading devices can also be integrated into the KNX bus system.
Becker supplies both tubular drives with an integrated SMI interface and the matching SMI actuator.

With this system concept, planners, roller shutter and sun protection technicians as well as the electrical trade can off er their end customers a particularly economical automation solution.

Standard





… with sense and

reason

This is because if the drives are connected in parallel drives in parallel, only one 5-core cable is required for the power supply and bidirectional data transmission between the SMI actuator and the drives.
The wiring eff ort is signifi cantly reduced. Depending on the application, up to 16 drives can be connected in parallel with the appropriate actuator.

The actuator supports all SMI standard functions as well as additional functions parameterised by Becker.

FIT FOR SMART HOME

For a long time, a smart home was a luxury. Fortunately, things are diff erent today: we all benefit from technological progress and solutions that make life easier and safer.

Whether you opt for the full programme straight away or prefer to start small is entirely up to you.

With Becker you are always on the safe side:
All solutions are easily expandable if required and can also be easily combined with other products thanks to their high level of compatibility.

Speaking of safety:

You are also our top priority when it comes to data protection. With Becker, you save your personal settings directly on the CentralControl, not on an external server. Because we want sensitive information to stay where it belongs: in your home.

BECKER
for you. forever.

Your way to the

smart home.

With Becker.

Wherever you live: Becker is close to you - with strong partners from the specialised trade. Get individual advice and realise your dream of smart living. Our partners will also provide you with reliable and competent support for the professional installation of Becker solutions. For a good feeling right from the start.
