

Making relaxing together easier.

Open and close roller shutters
via radio controls:
with BECKER.

BECKER
Together it's easier.

Flexibly in motion

Radio control of roller shutters with BECKER

Get your roller shutters moving without having to move yourself: With just one press of a button on your handheld transmitter, which takes care of everything else for you via radio. Or you like it even more comfortable and leave the work directly to a timer. Set once, done. Enjoy the comfort and the advantage that, thanks to the interference-free frequency, nothing interferes – with BECKER.

TimeControl TC445-II
5-channel hand-held transmitter with timer

- Preprogrammed date, time and switching time function
- Large, clear display

- Enables the programming of 2 freely selectable intermediate positions
- Can be integrated into switching ranges from many manufacturers with 55 x 55 mm central board dimensions
- Can also be used as hand-held device

Roller shutter drive
with integrated radio receiver

- Sensitive obstacle detection to save the roller shutter when encountering an obstacle
- Anti-freeze mechanism at the top and below
- Burglar resistance when using anti-lifting devices
- Protection of your fly screens thanks to special function

Your specialist dealer:

Intelligent roller shutter technology

With their integrated radio receiver, the drives of the premium series provide individual comfort. Individual, group and central control sets according to your requirements. The roller shutter curtain is absolutely protected by many electronic features.

Save energy

If you close your roller shutters at nightfall, you can reduce heating costs by up to 15%. And because your roller shutter control takes care of it, you don't even have to get up for it.

Radio comfort

Small signal, big effect: With the wireless solutions from BECKER you have your roller shutters under control any time. Parallel or individual, they can be conveniently controlled and positioned at the touch of a button. And that without complex wiring.
