Together it's easier.

# Enjoy the summer

## Controlling awnings and Venetian blinds with BECKER

One moment bright sunshine - and suddenly dark storm clouds appear. But instead of rushing outside quickly or home to retract your awning, just relax. Because it has done this itself for a long time, just like your Venetian blinds - fully automatically controlled by drives and controls - from BECKER.

### Sun protection drives

with integrated radio receiver

- Universal use in many shading systems, such as folding arm awnings, cassette awnings or screens
- Blocking detection during entry and exit to protect your sun protection system
- The function for tightening the fabric can be activated as an option, which ensures that the curtain always remains attractive and taut when extended
- On-site operation is possible with a conventional single button

→Special drives for Zip screens are also available from Becker.

### Radio controlled sun-wind-set

Sensor with hand-held transmitter (SWS441-II)

- For controlling a radio drive or an external radio receiver
- Universally applicable for exterior sun protection
- Convenient setting of sun and wind threshold values at the transmitter
- Adjustable sensor foot for optimum mounting
- Optional: Supports connection of rain sensor

### Solar radio controlled sun-wind-set

Solar sensor with hand-held transmitter (SWS641-II)

- With integrated solar power supply, there is no need to lay cables to the main power supply
- For controlling a radio drive or an external radio receiver
- Can be used with exterior sun protection systems that do not serve as screening
- Convenient setting of sun and wind threshold values at the transmitter
- Adjustable sensor foot for optimum mounting

### Radio controlled sun-wind-rain-set

Rain sensor with hand-held transmitter (SWS541-II)

- Integrated rain sensor - causes the curtain to open or close
- Universally applicable for exterior sun protection
- Convenient setting of sun and wind threshold values at the transmitter
- Adjustable sensor foot for optimum mounting

Your specialist dealer:

### Click instead of crank

At the touch of a button you can easily control your awnings and Venetian blinds according to your wishes. The threshold value setting also prevents the sunshade from constantly moving in and out during a sun/cloud mix.

### Always in touch

Even when you are on the move, you have everything in view - if you integrate your sun protection into the CentralControl system. For example, you can use your smartphone to extend the awning on the road and ensure a cool place to sit.

### Safety and durability

Upcoming wind or first raindrops? The sign for your awning to move automatically to safety and retract exactly. In this way it will remain with you for a long time - and with it the comfort you enjoy.
